

# LEAF SAP SAMPLING GUIDE

## Peanuts

### Keep in mind!

- Avoid outer rows and first 20 feet of a row.
- Sample leaves with average leaf quality. Sample areas of abnormal growth separately.
- Sample consistently; sunny side of tree, avoid extreme weather etc.
- If leaves are wet at sampling lightly pat dry before shipping (moisture influences results).
- Sap Analysis data works best when used in progression. The more samples the better crop nutrient uptake can be illustrated and understood.
- Note fertilizer and irrigation times and application rates if possible.
- Sample either before or 3+ days after fertilizer/pesticides have been applied.

### Sampling Instructions

**Sample Time:** Sample in the morning before 11 a.m. and temperatures less than 80 °F for adequate leaf tension and moisture. Avoid sampling in the rain. Store samples in cooler.

**Sample Size:** Collect 80+ grams each of both new (young) and old compound leaves (see back for reference) for a collected total of 160+ grams per sample set. Bag compound leaves separately labeled New and Old.

**Initial Sampling:** Begin sampling at the 5-7 compound leaf stage (pre-flowering). Collect NEW compound leaves only. Sample oldest fully developed compound leaf in zip lock bag labeled NEW.

**Sequential Samples:** New & Old compound leaf set every 2+ weeks in combination with growth stages: pre-flowering, pegging and nut sizing.

**NEW-** Youngest fully expanded compound leaf (see back for reference) from the growing point of the plant. Place stacked compound leaves in zip lock bag labeled NEW.

**New leaf = newest yet fully developed compound leaf**

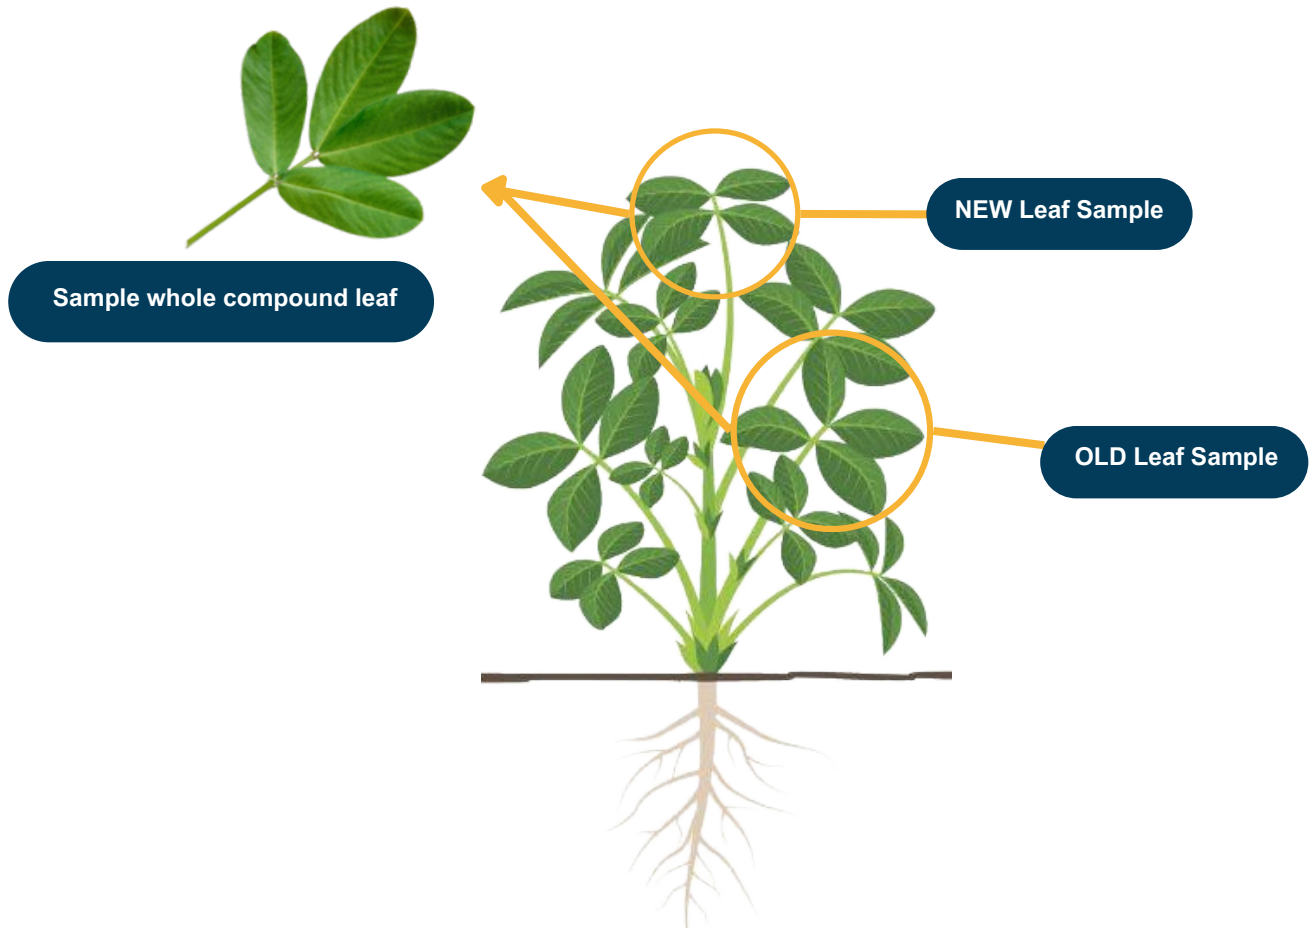

**OLD-** Oldest still healthy and functional compound leaf from the bottom of the plant. Place stacked compound leaves in separate zip lock bag labeled OLD.

**Old leaf = oldest yet still viable compound leaf**

**\*\*Do not mix varieties when sampling as this may cause variation in analyses\*\***

# LEAF SAP SAMPLING GUIDE

## Peanuts

**Keep samples cool. Ship overnight or 2-day on M/T/W (morning arrival time) with ice packs. Samples should not come into direct contact with ice packs. Let air out of bags before shipping.**

**All samples must be accompanied by a fully completed Sample Submission Form. Fillable version available on our website [www.newagelaboratories.com](http://www.newagelaboratories.com).**
