## LEAF SAP SAMPLING GUIDE Tomato

#### Keep in mind!

- Avoid outer rows and first 20 feet of a row.
- Sample leaves with average leaf quality. Sample areas of abnormal growth separately.
- Sample consistently; sunny side of plant, avoid extreme weather etc.
- If leaves are wet at sampling lightly pat dry before shipping (moisture influences results).
- Sap Analysis data works best when used in progression. The more samples the better crop nutrient uptake can be illustrated and understood.
- Note fertilizer and irrigation times and application rates if possible.
- Sample either before or 3+ days after fertilizer/pesticides have been applied.

### Sampling Instructions

**Sample Time:** Sample in the morning before 11 a.m. and temperatures less than 80 °F for adequate leaf tension and moisture. Avoid sampling in the rain. Store samples in cooler. **Sample Size:** Collect 80+ grams each of both new (young) and old <u>compound leaves +</u> <u>petiole</u> for a collected total of 160+ grams per sample set. Bag new and old <u>compound</u> <u>leaves + petiole</u> separately in zip lock bags labeled New and Old.

**Initial Sampling:** Begin sampling when plant develop 5+ compound leaves. Collect NEW fully developed <u>compound leaves + petiole</u> only. New leaf sample will be 2nd or 3rd from growth point. Place stacked <u>compound leaves + petiole</u> in zip lock bag labeled NEW.

Sequential Samples: New & Old leaf set every 2+ weeks.

**NEW-** Youngest fully expanded <u>compound leaves + petiole</u> from the top part of the plant. Place stacked <u>compound leaves + petiole</u> in gallon zip lock bag labeled NEW.

#### New leaf = newest yet fully developed compound leaf

**OLD-** Oldest still healthy and functional <u>compound leaves + petiole</u> closest to the base of the plant. Place stacked <u>compound leaves + petiole</u> in separate zip lock bag labeled OLD. **Old leaf = oldest yet still viable compound leaf** 

\*\*Do not mix varieties when sampling as this may cause variation in analyses\*\*

Keep samples cool. Ship overnight or 2-day on M/T/W (morning arrival time) with ice packs. Samples should not come into direct contact with ice packs. Let air out of bags before shipping.

All samples must be accompanied by a fully completed Sample Submission Form. Fillable version available on our website <u>www.newagelaboratories.com</u>.
