

General Sap Sampling Guidelines

Contact NEW AGE Labs to set up account, request crop specific sap sampling guide

Sample in the morning before 11 am AND temperatures less than 80F

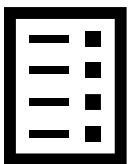

Use zip-lock bags, place NEW & OLD leaves with petioles in separate labeled bags. Let the air out of the bags after sampling

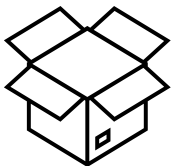

Weigh bag to ensure 80+ grams of leaves for collective total 160+ grams per sample set (some crops require increased sample size)

Take cooler out to fields to store samples, must keep leaves cool
Samples must not come in direct contact with ice packs

Fill Out & sign Chain of Custody form. Include form with sample shipment to the lab. All samples must be accompanied by a COC

Ship samples (1-2 day) in insulated package or box with gel type ice packs, samples must NOT come in direct contact with ice packs.
Ship to: 160 Veterans Blvd, South Haven, MI 49090

Results will be sent to email(s) indicated on the Chain of Custody form in 24-48 hrs upon receipt of samples at the lab
